### **DETAILED ACTION**

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14,15,17 are rejected under 35 U.S.C. 102(b) as being anticipated by Narayanan et al (US 5231070; 7/27/93). Narayanan teaches a method of applying a composition comprising dicamba, bentazon, bialaphos, diruron, linuron, atriazine, or diquat (post emergent herbicides) plus a methacrylate type polymer. Narayanan teaches that the composition is applied to the soil in a pre-emergent application. See abstract, column 2 line 64 – column 4 line 47.

Claims 14,15,17 are rejected under 35 U.S.C. 102(b) as being anticipated by Sanders (US 5635447; 6/3/97). Sanders teaches a method of applying a composition comprising atriazine (post emergent herbicides) plus a polyacrylic acid polymer. Sanders teaches that the composition is applied to the soil (a pre-emergent application). See abstract, column 2 line 36 – column 3 line 18.

***Claim Objection***

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not suggest the instant method comprising genetically modified plants.
